SUMMARY

Passionate Computer Engineering student with practical experience in building dynamic web applications. Adept at solving real-world problems through code and always eager to take on new challenges. Looking to contribute my technical expertise and creativity to a forward-thinking team.

EDUCATION

PILLAI COLLEGE OF ENGINEERING **Panvel, Navi Mumbai**

Bachelor Of Technology, Computer Engineering – 9.79 CGPA 2023-2027

SHREE SATYA SAI VIDYALAYA **Jamnagar, Gujarat**

HSC – 77% SSC – 97.11% 2020-2023

TECHNICAL SKILLS

- Programming – **C, Java, Python, JavaScript**
- Frontend – **HTML5, CSS3, ReactJS**
- Backend – **PHP, Flask**
- Databases – **MySQL, PostgreSQL**
- Deployment & Tools – **Firebase, Supabase, Git**

PROJECTS

Text Summarizer & Sentiment Analyzer [Streamlit, integrated Hugging Face Transformers, Newspaper3k, Trafilatura] **Oct 2025**

- Developed an AI-powered NLP website that summarizes lengthy articles or custom text and analyses overall sentiment (Positive, Neutral or Negative).
- Implemented URL-based article extraction, integrated Hugging Face Transformer models (*facebook/bart-large-cnn*, *distilbert-sst-2*), and added metadata insights

Tifflet - E-commerce Website For Sustainable Essentials [HTML, CSS, JavaScript, Firebase, PayPal, EmailJS] **Oct 2025**

- Developed a responsive e-commerce website using HTML, CSS, JavaScript, and Firebase for browsing and purchasing eco-friendly tiffins, bottles, and containers.
- Implemented core shopping features including cart management, order summary, stock tracking, secure payment integration, automated order confirmation emails and Admin Dashboard for managing products and maintaining real-time inventory updates.

Civic-Central [TypeScript+Vite, FastAPI, Supabase] **Sept 2025**

- Designed and developed a web-based for citizens to report civic issues with image uploads, location tagging, and status tracking.
- Enabled real-time communication between users and municipal authorities, improving transparency and response efficiency in local issue management.

RecycoKart [React+Vite, Flask, FastAPI, Firebase] **Sept 2025**

- Developed a full-stack platform to connect households and verified scrap collectors with real-time scrap price updates and doorstep pickup scheduling.
- Integrated AI-powered waste and price prediction models using *Scikit-learn* to forecast recycling trends and promote sustainable waste management.

TiffinSpin – Homemade Meal Delivery Website [HTML, CSS, JavaScript, Flask, MySQL] **Apr 2025**

- Developed a fully functional website to manage tiffin service orders and customer data.
- Enabled dynamic menu browsing, cart functionality, and order placement with confirmation features.

CERTIFICATRIONS

- PHP And MySQL Training - IIT Bombay Apr 2025
- Blockchain Basics Using Solidity Programming - PCE Nov 2024
- Python 3.4.3 Training - IIT Bombay Oct 2024
- Programming In Java - NPTEL Apr 2024
- Java Training - IIT Bombay Apr 2024
- Statistics For Data Science - PCE Jan 2024

ACHIEVEMENTS

- Cleared Internal Round of Smart India Hackathon (SIH) 2025 with the project Cognify – AI-Based Dementia Detection System.
- Finalist Of Hackcelestial 2.0, Pillai College of Engineering, for the project RecycoKart – Recycling Marketplace Platform.
